INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/012780

Вох	k No. V			ticle 35(2) with regard to novelty, inventive step or industrial applicability; porting such statement	
1.	Statement				
	Novelty (N)	Claims	1-9	YES
			Claims		NO
	Inventive	step (IS)	Claims	1-9	YES
			Claims		_ NO
	Industrial	applicability (IA)	Claims	1-9	YES
			Claims		_ NO

- 2. Citations and explanations (Rule 70.7)
 - 1. With regard to claim 1:

Claim 1 meets the requirements of PCT Article 33(2) to (4) for novelty, inventive step and industrial applicability.

Since none of the documents cited in the search report or acknowledged in the introductory part of the description contains all of the features of independent claim 1, the subject matter of claim 1 is novel.

A person skilled in the art is not prompted by any of the search report citations to design an overload safety coupling forming a bridge between a toothed spindle section and an interference-fit spindle section according to DE-C-43 26 868 with a rotating sliding sleeve according to the characterizing part of claim 1. The feature whereby the rotating sliding sleeve, which at one end takes up the toothed spindle section in an axially displaceable manner with inner toothing and at the other end encloses the spindle section with an inner sleeve in the interference fit, and whereby a rear sleeve-like projection of the rotating sliding sleeve forms, by means

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

of a pressure sleeve and a pressure gap tensioned by pressure medium, a rotationally rigid frictional connection that yields in the case of overload, is the result of a step that is not a straightforward development of the cited prior art. The safety coupling according to claim 1 therefore involves an inventive step.

The subject matter of claim 1 can be made and used, and is therefore industrially applicable.

2. With regard to claims 2 to 9:

Dependent claims 2 to 9 contain advantageous and nonobvious embodiments of a safety coupling according to claim 1.

Claims 2 to 9 therefore also meet the requirements for novelty, inventive step and industrial applicability under PCT Article 33(2) to (4).
